

# NICK WEBER-ROUGHTON

<http://nwr.design> | [nick@nwr.design](mailto:nick@nwr.design) | (425) 314 3694

I am a Designer with a proven attention to detail, great organizational skills, and a passion for my work and the creative process as a whole. I'm capable of working independently when necessary, but excel creatively when I can coordinate with other talented and passionate individuals.

---

## EXPERIENCE

### Amazon | 2024

Visual Designer

I am currently working to help bring creative concepts to life by developing shot lists, wireframes and product detail pages for Amazon Device's fall product launch.

### Logitech Gaming | 2022 – 2023

Lead UX Designer

Sole designer responsible for all web UX requests on Logitech Gaming. I built several product pages for new to world Logitech G products, along with standardized product page templates to help improve production timelines.

### Amazon | 2018 – 2022

Visual Designer

I designed several product pages for new to world Amazon devices while supporting merchandising for those products. I built fixture glossary to simplify communication between designers and marketers working on offline merchandising in North America. I supported merchandising for Amazon Gateway and on-site, off-site, and offline print, including through major holidays like Black Friday and Cyber Monday.

### Microsoft | 2017 – 2018

Production Designer

I supported the WWRCM organization through online and offline print production for multiple lines of business, including Office, Surface, Xbox, and more. I personally curated an online/offline asset library to reduce production time by nearly 50%.
